

AUTOMATIC ARM BARRIER

PHOENIX 8

PRODUCT OVERVIEW

An electromechanical arm barrier with a 36VAC brushless motor, designed for industrial use and passages up to 8 meters wide.

It features a round aluminum boom, while the barrier cabinet is cataphoresis-treated and epoxy powder-coated, making it suitable for use in various climatic conditions.

The system is designed for high-traffic areas and large industrial facilities where reliability, speed, and safety are essential. Available options include a movable foot, fixed fork, and articulated arm.

TECHNICAL SPECIFICATIONS

Mains Power Supply	230 V – 50/60 Hz
Motor Power Supply	Brushless 36VAC
Maximum Absorbed Current	2.2 A
Opening Time	8 sec
Duty Cycle	Industrial / Continuous
Protection Rating	IP55
Encoder	Incremental + Angular Encoder
Operating Temperature	-20°C to +70°C
Lubrication	Permanent grease
Passage Width	8.0 m
Weight	63 kg
Pieces per Pallet	6
Control Unit	ATLAS
