

INDUSTRIAL SLIDING GATE OPERATOR

Industrial Sliding Gate Operator

PRODUCT OVERVIEW

Industrial and commercial sliding gate operators are heavy-duty automatic gate drive systems built for large, heavy, and frequently operated sliding gates. They provide reliable, smooth, and efficient gate movement while supporting demanding operating cycles, and are offered in a range of models and capacities to meet different gate sizes, weights, and operating requirements — suitable for industrial facilities, commercial properties, and other high-traffic entrances.

TECHNICAL SPECIFICATIONS

Gate width	2 to 10 m
Drive system	Rack & Pinion
Power supply	220V, 1 phase, 50-60Hz (3-phase option available)
Motor type	Electric gear motor
Gate weight capacity	Up to 1,600-4,000 kg
Gate speed	Depending on model
Proximity sensor	Available to sense the position of the gate
Manual release	Available
Dual safety loop detector	Used for safety (optional)
